Reckless use of AI is unethical

Elise Kristiansen

Frontend Developer in Variant

[judging]

(sad music playing)

pathetic.

the rage in me builds

go to hell for ever bitch, how about that. fuck human rights.

What AI is

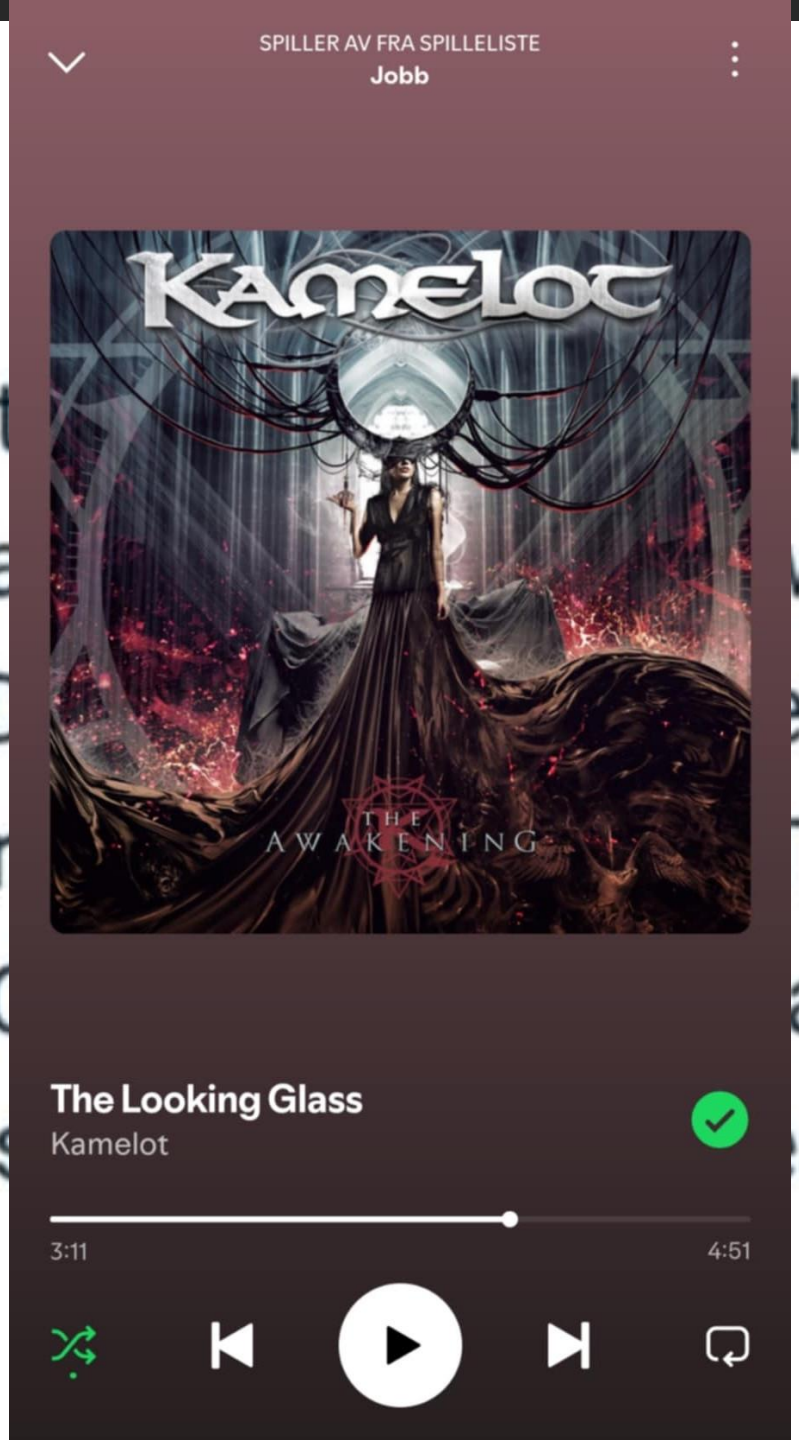
What AI is

A dirty, little liar

AI-oversikt

+2

Kamelot does not "The Looking Glass," but there a with that title by other bands like D e La's, and The Birthday Massacr Theater song, the main chords are C and G#m, while "The Looking Glas s chords like A, D, and Dm.



What AI is

A dirty, little liar

People pleaser

Biased. Insanely biased.

Okay, so what’s the problem?

Regjeringen ber 80 prosent av offentlig sektor bruke KI innen 2025

– Så urealistisk at jeg nesten må le litt, sier KI-forsker.

Artikkelen er mer enn ett år gammel.

It’s already happening.

Okay, so what's the problem?

Discrimination in hiring

Wage gap

Differences in fields of study

Fewer female applicants for jobs

Stigma against fathers in child custody cases

Stigma against already marginalized groups.

«Every part of the process in which a human can be biased, AI can also be biased, and the difference is technology legitimizes bias by making it feel more objective, when that’s not at all the case.»

NEWS & COMMENTARY

The Untold Number of People Implicated in Crimes They Didn't Commit Because of Face Recognition

The sheer scope of police face recognition use in this country means that people have almost certainly been — and will continue to be — misidentified, if not arrested and charged for crimes they didn't commit.

Clare Garvie,
Georgetown Law's Center on Privacy and Technology

Share This Page

In January, Michigan resident Robert Williams was arrested for shoplifting from a watch store in downtown Detroit a year ago—a crime he did not commit. Police thought he was connected to the crime because of a face recognition search that found similarities between grainy surveillance footage of the theft and Mr. Williams' driver's license photo.

ICE

ICE's Facial Recognition App Misidentified a Woman. Twice

JOSEPH COX · JAN 19, 2026 AT 9:28 AM

In testimony from a CBP official obtained by 404 Media, the official described how Mobile Fortify returned two different names after scanning a woman's face during an immigration raid. ICE has said the app's results

Minister tordner mot Google: – Fullstendig uakseptabelt

Digitaliseringsminister Karianne Tung (Ap) sier Google bør ta ned sin KI-modell etter at politiker feilaktig ble hengt ut som seksualforbryter.

With great power etc.

Frp vil tillate politiet å bruke ansikts-gjenkjenning

Frp mener Norge bør følge Sveriges eksempel og tillate politiet å bruke kunstig intelligens og ansiktsgjenkjenning i sanntid.

Be smart.

Be smart.

Learn to say no.
